

Mr David Wright

GAICD, FPMIQ, PMP®

David Wright is one of the leading portfolio, program and project management professionals in Australia. He has won Australian national awards for his delivery, is highly recommended for his project advisory, assurance and mentoring and works in partnership with lead authors of Axelos and PMI products.

As Past President and Fellow of PMI Queensland, David contributes to the direction of the largest global project management association. David transformed the way in which PMIQ engages Queensland industry and he oversaw its largest period of growth since establishment.

David works with other C-levels, helping them understand the value of project portfolio management and implementing change to bring about successful strategy execution.

David is Managing Director of consulting firm QVC Solutions and holds a range of credentials including the PMP, PRINCE2®, P3M3®, MoP® and AgilePM. He is also a graduate of the Australian Institute of Company Directors.

Synopsis:

SUCCESSFULLY EXECUTING STRATEGY THROUGH PROJECT PORTFOLIO MANAGEMENT

Most Company Boards and C-levels have no idea how to implement strategy. They decide on strategy and tell the business to implement it. I know; I sit on Boards. PMI stated two years ago in its Pulse of the Profession that a high performing PMO is FOUR TIMES more likely to executive strategy successfully than a low performing PMO. Last year, PMI's Thought Leadership series told us about the alignment of high-maturity organisations and the Enterprise PMO. So what does all this mean and how do we go about it?

David will take you on the journey of selling project portfolio management to your C-levels and implement, it with practical examples of real-life organisations. He will draw on capability maturity assessments and references to his experience as a certified and experienced Board Director.

You will leave with key learnings and references from this interactive session.
